

The Total Solution for Processing Credit Cards and Checks

Mobilescape provides mobile merchants with a total end-to-end payment processing solution for credit cards and checks that includes:

- Hardware and software
- Credit card processing
- Check conversion, verification and guarantee services
- Secure transactions
- Wireless service
- 24 x 7 x 365 customer support

This is a huge deal. This allows mobile professionals and delivery personnel to verify funds while at the consumer's premises. If something is wrong, they can get another form of payment right there rather than having to track down the people again. This is a huge money saver for the companies that do these kinds of services.

The Solution

No more bad checks!

The Mobilescape® 5000 is the first wireless, handheld payment processing solution for both checks and credit cards. The Mobilescape terminal enables secure, rapid payment transactions everywhere. It is easy to use and provides the convenience of accepting both checks and credit cards—*all in one unit*.

The Mobilescape 5000 lets you deposit checks right at your customer's home or place of business. With a verification service, you can instantly screen the check and check writer against a large database of bad check writers. With a guarantee service option, you pay a small fee based on the size of the check and are guaranteed to receive payment.

Mobilescape 5000 Key Features
