

Mobilescape for Residential Services

Whether you're an individual with your own business or a company with a fleet of service trucks, you can now process credit cards and checks right at your customer's location. Many at-home customers expect to write checks, and the Mobilescape solution gives you the flexibility and power to accept both checks and credit cards.

No More Bounced Checks

You swipe the check and receive approval in less than 10 seconds. You can accept checks without risk because payment is guaranteed!

No Time Wasted with Rejected Credit Cards

You won't discover later that a credit card has expired, that you've incorrectly written a credit card number, or that a card is over its limit. With the Mobilescape, credit cards are processed and authorized on the spot.

Reduce Credit Card Fees

The Mobilescape device enables merchants to swipe and process credit cards on the spot, and when there's a card-present transaction, merchants save money by qualifying for lower "card-present" processing fees.

Receive Funds Faster and Improve Cash Flow

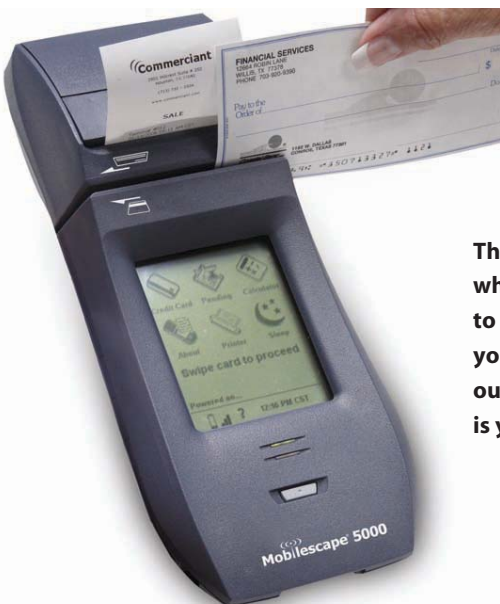

Check and credit card payments are processed and deposited to your bank account automatically. Credit card payments are batched and processed overnight. Check payments are usually credited to your account the next business day . . . you don't wait 2-5 days for checks to clear.

Speed Up Transactions and Save Time

Since payments are processed in less than ten seconds, you're free to spend more time with your customer or move on to your next service call to make more money. You no longer have to write up receipts, prepare bank deposits, go to the bank, phone in credit card sales to your home office during a service call (or phone in sales at the end of the day), re-enter numbers that have been punched incorrectly . . . or make awkward calls to customers due to bounced checks and rejected credit cards.

Reduce Chargeback Risks

With Mobilescape's signature capture, you can easily retrieve the customer's signature and receipt from the online Mobilescape Manager. This easy, accessible proof of transaction quickly ends the dispute and eliminates chargeback risk.

The Mobilescape is ideal for anyone who's on the road providing services to homes and businesses. If you or your employees collect payments outside your office, the Mobilescape is your solution.

Mobilescape[®]
by BankServ

"For HVAC companies, the risk of accepting a bad check is always a concern, and paying high credit card processing fees is a drain on the bottom line. Mobilescape provides value two ways. First, it enables technicians to deposit checks into the company's bank account without ever leaving the work site. Simply put, it means no more bounced checks. Second, since credit cards are swiped rather than being telephoned into a central office, the processing rates are lower. Mobilescape is a must have wireless payment solution for HVAC companies."

**Elliott Soloklow, Past President
Air Conditioning Contractors of America (ACCA)**

"When we switched to Mobilescape from our previous wireless payment solution, we saw an immediate and substantial return on our investment. We're now saving significant money in credit card processing fees, and our technicians are now focusing on making service calls instead of managing credit card receipts."

**Robert Greenblatt, Finance Manager
Cropp-Metcalf HVAC**
